PanelView Component Family

This component-level operator interface provides a control and visualization solution for low-level applications that use serial or Ethernet communication. This device can connect directly to the PowerFlex® 4 drives. Preferred controllers include the Allen-Bradley® MicroLogix™ and Micro800™ families.

The integrated mounting clamps and quick-lever clips provide for panel installation and maintenance.

These 2-inch to 10-inch displays have built-in programming software that is accessed from a web browser over a USB or Ethernet connection. You can design your application and adjust terminal settings while viewing the results directly on the connected terminal. Secured programming access, unicode language switching, alarm messages and history, and recipe operations are other key features.

Software

The PanelView Component operator interface with its on-terminal programming software removes the need to install software on a personal computer and reduces both start-up and service time. Connect your computer to the PanelView Component terminal through a USB cable or Ethernet, then launch the software through your web browser. Microsoft Internet Explorer and Mozilla Firefox are supported. A dashboard provides one point of entry for accessing all terminal and design operations.

Take advantage of these features while connected to the terminal:

- Launch the design environment where navigation tabs guide you through application development.
- View the results of your design efforts directly on the terminal without having to download the application first.
- Modify terminal display and communication settings, view system information, and enable login security.
- Transfer files between PanelView Component terminal storage and a USB flash drive, SD card, or computer; and delete files from terminal storage.
- Change the start-up application or language the terminal uses for configuration screens and diagnostic messages.

For programming without a PanelView Component, you can create an application using the free DesignStation software or an emulator. The emulator and browser must be on the same computer.

Table 9 - Supported Browsers and Platforms

Operating System	Browser	Platform Supported
Windows 7 Windows Vista Windows XP, Service Pack 2 (SP2)	Internet Explorer 7 and 8, Firefox 3.0	Terminal and emulator
	Internet Explorer 7 and 8	DesignStation 2.0 or later

Cables

Use these cables for connecting PanelView Component terminals.

Table 10 - Cables for PanelView Component Terminals

Cat. No.	Description	For Use with These Terminals
2711C-CBL-UU02	USB-A host to USB-B device cable, 2 m (6.5 ft)	C200, C300, C400, C600, and C1000
2711P-CBL-EX04	Ethernet crossover CAT5 cable, 4.3 m (14 ft)	C400, C600, and C100
2711C-RCSD	USB to SD adapter with SD card	C200, C300, C400, C600, and C1000

Important User Information

Read this document and the documents listed in the additional resources section about installation, configuration, and operation of this equipment before you install, configure, operate, or maintain this product. Users are required to familiarize themselves with installation and wiring instructions in addition to requirements of all applicable codes, laws, and standards.

Activities including installation, adjustments, putting into service, use, assembly, disassembly, and maintenance are required to be carried out by suitably trained personnel in accordance with applicable code of practice.

If this equipment is used in a manner not specified by the manufacturer, the protection provided by the equipment may be impaired.

In no event will Rockwell Automation, Inc. be responsible or liable for indirect or consequential damages resulting from the use or application of this equipment.

The examples and diagrams in this manual are included solely for illustrative purposes. Because of the many variables and requirements associated with any particular installation, Rockwell Automation, Inc. cannot assume responsibility or liability for actual use based on the examples and diagrams.

No patent liability is assumed by Rockwell Automation, Inc. with respect to use of information, circuits, equipment, or software described in this manual.
